PROFILE

Aspiring software engineering student passionate about exploring technology's potential. Committed to creating scalable solutions with strong technical skills and a drive for innovation.

LANGUAGES

- English (Proficient)
- Arabic (Elementary)

EDUCATION

Bachelor of Science
University of Pécs
09/2021 – 02/2025 | Pécs, Hungary
Computer Science Engineering

SKILLS

- HTML, CSS, JavaScript, TypeScript, Java
- React.js, SvelteKit, Tailwind CSS, Bootstrap
- Node.js, Express.js, Spring Boot
- MongoDB, MySQL
- RESTful APIs, JSON, Axios
- Git, GitHub
- Azure, Amazon Web Services, Linux

PROJECTS & EXPERIENCE

Recipe App
- Crafted the user interface of a Recipe App using React.js,
- Engineered backend functionalities with Express.js, ensuring efficient data storage in a MongoDB database.
- Enhanced app capabilities by integrating APIs to dynamically fetch recipe information.

https://github.com/Nabeel-99/FoodRecipe.git

Dictionary App
- Developed a Dictionary Application with an intuitive and responsive interface using React.js.
- Incorporated custom words with real-life examples for better comprehension.
- Efficiently stored data in MongoDB, accessible via RESTful APIs for seamless integration.

https://github.com/Nabeel-99/DictionaryApp.git

Task Manager App
- Developed a task manager web application using Svelte Kit
- Used Firebase Firestore to store user tasks and completed tasks.
- Implemented Firebase Authentication for user authentication in the project.
- Include features such as task creation, editing, deletion, and completion tracking.
