EDUCATION

University of Pécs   Pécs, Hungary
BSC in Computer Science Engineering

SKILLS

Development: Full-stack development, Web App Development
Technologies: React.js, Tailwind CSS, Node.js, Express.js, Java Spring Boot, MongoDB, MySQL
Tools: RESTful APIs, JSON, Axios, Git, GitHub, GitLab

PROFESSIONAL EXPERIENCE

Software Developer Intern
June 2024 - September 2024
• Developed an application to enhance task management among users by implementing features for scheduling and organizing group questions, facilitating efficient responses.
• Strengthened problem-solving skills by resolving complex issues during development, collaborating with developers to eliminate software bugs and ensure the application's reliability.
• Utilized PHP Laravel for backend services, MySQL for data storage and retrieval, and React.js for creating an interactive user interface, effectively delivering a comprehensive solution while participating in Agile and Scrum methodologies.

Freelance Developer
October 2022 - June 2023
- Created a dynamic website for a friend's family business using React.js and Tailwind CSS.
- Partnered to fix bugs and improve functionality in a Music Playlist application built with SvelteKit.
- Collaborated to develop a Rental Agency application using Java Spring Boot.
- Continuously updated skills through training courses, workshops, and self-study—staying current on industry trends and emerging technologies.

PROJECTS

Smart Meal Connect
- Developed a meal app for personalized recommendations based on user inputs and body metrics, integrating social features and APIs, with JWT for secure authentication. Built using React.js, Express.js, and MongoDB.
Project Link 🔗

• **Data Labeler Application:** Developed a scheduling app for distributing surveys across user groups using React.js for the frontend, PHP Laravel for backend services, and MySQL for data management.
Project Link 🔗

• **Task Management Application:** Built a task management app in SvelteKit with Firebase authentication and Firestore for data storage, converted to mobile with Capacitor JS, incorporating camera and geolocation features.
Project Link 🔗

• **Football Manager App:** Created with Java Spring Boot for managing players, teams, and matches using CRUD operations, Swagger for API documentation, and Spring Security for authentication, with dynamic UIs designed in Thymeleaf.
